Motivationally Normal Person

- The dispute between Internalism and Externalism does not ammount to the question whether motivationally handicapped person would be moved by moral belief alone but rather to the question whether motivationally normal person would be moved by moral belief alone.

Sanford C. Goldberg (ed.), Internalism and Externalism in Semantics and Epistemology

We need only remind ourselves of how much knowledge and justified belief is gotten from perceptual experience and we then realize that a great many items of knowledge and justified belief are not arrived at via reasoning, however generously we construe that operation. In the Meditations Descartes entertains the possibility that he is deceived by a powerful demon in believing that for example, he has hands. While epistemic internalism is troubled by this problem, semantic externalism finds no difficulty in handling it.

Internalism and Externalism in Epistemology on JSTOR

Here we will cover just potential awareness aligned with doxastic justification; that should be enough to show

the strength of the dilemma argument. The 'new evil demon' argument for internalism and against externalism begins with the observation that individuals like us on the inside will be as justified as we are in believing what we believe. A priori knowledge is understood as a paradigmatic example of such beliefs.

Internalism and Externalism in Epistemology

The types of external structure or activity involved in developing the idea of extended mind reflected this focus on cognition. Hilary Putnams twin earth thought experiment is presented and analyzed.

What are internalism and externalism?

This strong version of accessibilism is often taken to be the purest form of internalism since internalism is not uncommonly associated with a commitment to higher-order principles such as one knows that p only if one knows that one knows that p.
