Further records and updates of range extension in House Crow Corvus splendens. The scarab icon became associated with Ra, the sun god, and scarab beetles, Scarabaeus sacer, were worshiped as a symbol of immortality. Reducing availability of human refuse, the primary food source of the species, is undoubtedly the most important measure in controlling its numbers in an area where it has reached pest proportions; this has, however, proven to be an elusive goal as most invaded areas lack the resources, organisation and infrastructure required for efficient waste management.
